

This chart has a main issue, it has been made tri-dimensional when the easiest way to present the information was to present it two-dimensional, the lines representing the regions could be made with characteristic colors, the 3 dimensions can confuse the reader since it is difficult to follow each line.

This chart should have been made as a bar chart, there is no point to compare crashes of a software to another year's software since the technology is very different, it would have been better to compare it with the same year software of the competing brand.

Difficult to understand, there is no X axis, also there is a blue man for no reason at the left of every group.
